Detail In Contemporary Lighting Design

Synopsis

Lighting is a key feature of almost all interiors but it is often treated in a rather superficial manner in most books. This volume features more than 40 recent international projects where the lighting is the defining design feature. Each project includes detailed plans, diagrams, sketches, and CAD visuals to demonstrate the lighting techniques involved. These are accompanied by an explanatory text that looks at the original brief, the design concept, and the detailed specification of the light fittings. A bonus CD includes technical drawings from the book. This book will be an invaluable resource for professional interior designers and architects in what is a fast-changing field.

Book Information

Series: Detail

Hardcover: 192 pages

Publisher: Laurence King Publishing; Har/Cdr edition (September 26, 2012)

Customer Reviews

This book is filled with very interesting recent (2012) lighting projects of many types and includes both details of construction and a CADD ready disk. I highly recommend it.

Just bunch of photos. So poor on details.

I am ok with product and services.

excellent details
